

Abstract of the Disclosure

The present invention is a portable dilution cleaning system for applying any detergent and/or rinsing product directly onto surfaces being cleaned. The system connects very quickly to a faucet (145) using a quick disconnect assembly (99) and a  
5 dispensing and rinsing gun (200, 200' or 300) sprays use solutions and rinse water directly onto the surfaces to be cleaned. The quick disconnect assembly (99) includes a quick disconnect with a back flow prevention (100) and a quick disconnect aerator (147). The quick disconnect aerator (147) connects to the faucet (145) and the quick disconnect with a back flow prevention (100) connects to the quick disconnect aerator (147). A hose  
10 (256) interconnects the quick disconnect assembly (99) and the dispensing and rinsing gun (200, 200' or 300).
